Meyers, of Carroll; ball game, Carroll vs. Glidden in the forenoon, and Lidderdale will play the winner in afternoon. This will be two games of ball worth while seeing. A special invitation is extended to the boys of Grant and Sheridan townships who have been called to the colors, an elaborate banquet will be given in their honor at 5:30. Sunday p. m. when returning from Rainbow Park, Theodore Schelsman and son, William, and two of the Schafer boys met with what auto drivers call road hogs. In trying to pass the road hogs' car Mr. Schelsman got too far to the ditch and his car upset, but fortunately none of the occupants were hurt. The auto will need some repairs. It seems strange that there are some drivers who seem to think they own the entire road, and want the other fellow to give them the whole road in passing. The auto license should be taken away from such drivers.

Cattle Killed
Monday night Henry Langel east of Manning lost 15 head of milch cows when a fast train crashed into his herd that had strayed on the railroad right-of-way. There were 15 cows in the herd and all were killed. One however was able to walk, but had to be killed later. The accident happened just northeast of the intersection of the north road to Templeton and the railroad, and it is a wonder that the train was not derailed. The cows were all good ones, and the loss will be greater than \$1500. As the cows were on the railroad tracks, Mr. Langel probably will claim damages from the railroad company. The chances were the cows were walking single file along the tracks and the train knocked one at a time off the track.—Manning Monitor.

How to Eat Green Corn
The best way to eat green corn so as not to annoy the rest of the family is to lock yourself up in a room alone with the corn, and then let the corn fly where it may. It is a good plan to sit in the bath tub. It is a good plan to wear a driving suit, without the helmet, when engaged in the pleasant acrobatic stunt of eating green corn. The butter can then drop at its own sweet will. Old fashioned ear muffs come in handy. They prevent the corn from getting into the ears. To prevent it from getting down the neck wear one of those tight rubber collars, such as the barber puts on you when he gives you an egg shampoo. An expert corn eater is able to get away with 50 per cent of the corn, while the other 50 per cent is scattered about the room. An amateur can get about 10 per cent of the corn at the first trial, but practice makes perfect.

Our Stock of Ready-to-Wear Garments is Now Complete. It is as Large as Any in This Part of The State
NEW STYLES IN THE
Suits For Fall Wear
Many of them have jackets that are only sufficiently long enough to reach to a little above the knees; many others to a little below. Some, however, are of uneven lengths being shorter in the front than at the sides and back. The skirts are designed to conform to them, being simple instead of elaborate in design in order to offset the cumbersome which elaborateness would encounter when worn with the long coats. In the larger sizes they have a tendency to outline the figure; in the smaller loose straight line effects predominate. Materials most popularly used are velours, Broadcloths, Serges, etc. The smartest of the earliest styles we are now showing. Come see them.
Prices - - - - \$20.00 to \$30.00
Separate Coats For Fall
Are Designed Upon Long and Straight Lines
This tends to give them an appearance, loose and flowing, but charmingly dressy and stylish; especially is this true of coats designed upon these lines for street and general utility wear. Some of the more dressy types, however, for afternoon and evening wear depart slightly from the straight line owing to the introduction of low draperies at the sides or through modifications of the barrel effect. Many novel effects in the form of collars, sleeves and cuffs. Belts and pockets, and fur trimmings help to bring out the general beauty of their lines in a way that is captivatingly admirable.
The materials which will be most extensively used in their making are Broadcloths, soft wool Velours, Serges, Gabardines and Tricotines. An early inspection of those we have here is invited.
Prices - - - - \$10.00 to \$25.00
Children's Coats **FOR FALL AND EARLY WINTER**
The "kiddies" coats as usual bear a close resemblance to the styles adopted by the "grown ups," long straight lined coats for example will be very popular this Fall. Some coats are cut in two sections, the lower section showing pleats or having panel backs and fronts with pleated sides.
The large and medium size collars are so arranged that they can be worn high about the neck in cold weather. Novelty cuffs or odd cut sleeves give a smart finishing touch while belts are also featured to considerable extent. High waisted effects will be very popular. Just note these popular priced numbers.
Prices - - - - \$5.00 to \$15.00
Beautiful New FALL SILKS
The new Fall Silks are much in demand. Silk is being used more this Fall than ever before on account of the increasing high cost of dress goods.
In Crepes, Crepe de Chine, Satins and Taffetas the demand will be unceasing. Novelty printed silks are not so conventional in design but instead, are made up as artistic creations. Fancy and novelty linings will be put to many new uses. Our assortments are exceptionally pleasing and invite your inspection. Note these splendid values.
